

## System errors

Node genera errores de sistema cuando ocurren excepciones en el entorno del runtime. A continuación se detallan algunos de los errores de sistema más comunes al escribir un programa node.js:

1. EACCES - Permission denied
2. EADDRINUSE - Address already in use
3. ECONNRESET - Connection reset by peer
4. EEXIST - File exists
5. EISDIR - Is a directory
6. EMFILE - Too many open files in system
7. ENOENT - No such file or directory
8. ENOTDIR - Not a directory
9. ENOTEMPTY - Directory not empty
10. ENOTFOUND - DNS lookup failed
11. EPERM - Operation not permitted
12. EPIPE - Broken Pipe
13. ETIMEDOUT - Operation timed out
